ADDITIONAL COMMENTS: This is a remarkable structure for several reasons. For one thing, the fence was constructed unusually late; most cemetery work was done late in 1935, and was among the first projects approved statewide. Also, the workmanship is marvelous, especially the symetrically placed pillars that are fashioned to form gabled roofs with rock shingles.

ADDITIONAL COMMENTS: It is interesting that this building has no corner stone referring to the WPA. All other armories constructed by that agency have either a stone or a WPA shield. Moreover, this structure is so much larger than that usually constructed by the relief agency and it was done under contract to a building contractor, C. M. Dunning. It is certainly an exception to what we ordinarily associate with WPA.

ADDITIONAL COMMENTS: This structure does not have a WPA shield on it. Whether it is for certain WPA would depend upon the extant records of the architect. School board records reflect that a 2nd addition was made to the school in 1939 in the amount of $50,000. On sight inspection reveals that the west end of the school is the "2nd" addition.

ADDITIONAL COMMENTS: This is a rather elaborate structure for WPA labor. School board records note that Irving was rebuilt in 1937 and that there was an addition in 1940. A contractor is mentioned for the addition, meaning that the job was accomplished through a bid with a private contractor. To that end, the financial arrangements were unusual.

ADDITIONAL COMMENTS: Just picnic tables hardly seems to justify a National Register Nomination. The WPA, however, did considerable work in Lincoln Park and certainly supplied considerable amounts of money, although the CCC seems to have been responsible for the amphitheater.

ADDITIONAL COMMENTS: Two things seem to me to disqualify this building for further consideration: it is only an addition, and secondly it was not constructed under usual circumstances for the WPA, i.e. by unskilled and unemployed labor organized by WPA superintendents. This job was let out under a contract to a private builder. There is, however, little question in my own mind that this addition to Cleveland School is the WPA project: School Board records refer to a 2nd addition in 1940, the date of the WPA project, and a careful examination of the structure itself suggests it was the second addition, to wit vents are larger on the 1940 auditorium addition and the bas shield above the entry is less bold.

ADDITIONAL COMMENTS: The Taft School addition follows in the same mode as Cleveland, Northeastern, Irving, Sequoyah, etc. There were WPA funds involved but the work was done through a private contractor, in this case Ellis and Nicholson. Moreover, this was the 3rd addition to the school building, the records in the board office relating to which match the WPA project files. Yet there is some question in my mind if the one story structure is the WPA addition, although a careful on site investigation would suggest that it is.

ADDITIONAL COMMENTS: Again, there is a minor problem of identification: Is this the 3rd addition? If it is, it is the WPA addition. But this structure too was under the supervision of a contractor. Why is there no WPA plaque? Given these questions, I do not feel justified in recommending it for nomination to the National Register.
